

Security Policy

Supported versions and disclosure process

Hamza Abdul Karim · F23607046 — May 2026

ABSTRACT

This document describes which releases are supported with security fixes and how to report a suspected vulnerability responsibly.

1. Supported Versions

The latest tagged release is supported with bug fixes and security patches. Older releases are not maintained.

2. Reporting a Vulnerability

Please do not open a public issue for security vulnerabilities. Instead, contact the author privately so the issue can be addressed before being disclosed. When reporting, please include:

- A description of the vulnerability and its potential impact.
- Steps to reproduce, including a minimal proof-of-concept if possible.
- The affected versions or commits.

3. Disclosure

We follow a coordinated-disclosure model: once a fix is available we publish a release and credit the reporter (unless they wish to remain anonymous). We aim to acknowledge the report within seven days and to provide a fix or mitigation timeline once we have confirmed the issue.
